

In a fire emergency, a two-story building can be just as frightening as a skyscraper.

That's why you need a Faraday Intelligent Fire Detection System.

New Faraday intelligent systems offer the world's fastest detection speed and the same advanced technology that protects many of the world's most sophisticated structures. But, they can be sized to fit the specific safety needs and budget of most fire safety applications. In an average of 3 seconds, they detect fire, initiate alarms and engage emergency control operations. They work with proven devices like our Digital Voice Evacuation Systems, and FireSmart® Intelligent Detectors that can be set for 11 different environments. Plus, installation is up to 25%* faster than typical systems.

Faraday Intelligent Fire Detection Systems. Because fire safety is a top priority no matter what size the building. For details, visit faradayfirealarms.com.

* Depending on size and type of building.

Analog/addressable and conventional fire control panels • Life-safety rated audio and visual alarms
